

Industrial Polishing Machine

This industrial polishing machine is suitable for nail, wood engraving, and craft carving. It can also be used for denture polishing, mould polishing, and circuit board drilling.

Overview

Precision Polishing Solution

The JD4G industrial polishing machine is a versatile precision tool engineered for high-performance material processing. Featuring a robust motor with adjustable speed control and a digital display, it ensures optimal results across various demanding applications. Its ergonomic, compact design allows for both benchtop and portable use, making it an essential asset for metalworking, jewelry crafting, and precision manufacturing.

Applications

Suitable Applications

- Nail care
- Wood engraving
- Craft carving
- Denture and artificial limb polishing
- Mould polishing
- Precision parts carving
- Circuit board drilling

Technical Features

Usage Type

Benchtop • Portable

Key Features

Adjustable Speed, Digital Display, Ergonomic Design, Compact Size, Durable Construction

Industry Focus

Target Industries

Metalworking, Jewelry Making, Dentistry, Electronics Manufacturing
