

Industrial Polishing System

This system is used for polishing nails, wood engravings, and circuit boards. It is also suitable for craft carving, denture polishing, and mould polishing.

Overview

Versatile Industrial Polishing Solution

This high-precision industrial polishing system is engineered for a wide range of demanding applications, from delicate craft carving to heavy-duty mould polishing. The unit features a portable control interface with a clear digital display, allowing for precise variable speed control. Equipped with a flexible shaft handpiece, it ensures optimal maneuverability for intricate tasks such as circuit board drilling and denture finishing.

Applications

Suitable Applications

Nail Care, Wood Engraving, Craft Carving, Denture Polishing, Artificial Limb Polishing, Mould Polishing, Precision Parts Carving, Circuit Board Drilling

Technical Features

Control Interface

- Digital Display
- Variable Speed Control
- Forward/Reverse Direction Switch

System Components

- Portable Control Unit
- Flexible Shaft Handpiece
