Product Overview

Industrial Polyurethane Swivel Casters

These industrial-grade swivel casters are engineered for reliability and smooth performance in demanding environments. Featuring durable polyurethane wheels and robust zinc-plated steel frames, they offer excellent maneuverability and wear resistance. Designed for versatility, these casters are ideal for hand trucks, platform trolleys, and various industrial equipment requiring dependable mobility.

Technical Specifications

Key Features

- Swivel design for 360-degree maneuverability
- Integrated brake mechanism for secure positioning
- Pre-drilled mounting plate for easy installation
- Heavy-duty construction for stability

Material Composition

Polyurethane Wheel, Zinc-plated Steel Frame

Applications

Suitable Applications

- Hand Trucks
- Hand Pallet Trucks
- Wheelbarrows
- Platform Trucks
- General Industrial Carts
