

Industrial Portable Axial Blower

This high-velocity portable axial blower is designed for industrial and commercial ventilation needs. It is ideal for confined space ventilation, cooling, and improving air circulation.

Product Overview

Industrial Portable Axial Blower

This high-velocity portable axial blower is engineered for demanding industrial and commercial ventilation applications. It features a durable, high-visibility housing with an integrated safety grille and a convenient carrying handle for easy transport. Designed for reliability, this unit is ideal for confined space ventilation, cooling, and general air circulation needs.

Technical Specifications

Performance Metrics

420 W Motor Power	2800 RPM Fan Speed	4200 CFM Air Flow	490 PA Pressure
-----------------------------	------------------------------	-----------------------------	---------------------------

Physical & Operational Data

Metric	Value
Noise Level	68 dB
Weight	10.5 kg
Dimensions	350 x 360 x 420 mm

Compliance & Origin

Manufacturing Origin

Made in China

Operating Conditions

Please ensure electrical operation is maintained when ambient temperature is less than 25°C.
