

Industrial Power Engine

This industrial engine provides a robust and reliable power source suitable for various applications. Its durable construction ensures efficient performance, longevity, and ease of maintenance.

Overview

Industrial Power Engine

This robust industrial engine is a reliable power source designed for demanding environments and various professional applications. Featuring an air-cooled, direct-injection 4-stroke diesel design, it balances high power output with efficient fuel consumption. Its compact dimensions and flexible starting system make it an ideal choice for integration into existing machinery or new projects where longevity and minimal downtime are critical.

Performance Metrics

Performance Highlights

7 Hp/Rpm

Rated Output

460 l/min

Max Capacity

50 m

Max Lift

Engine Specifications

Engine Model	F400
Engine Type	Air-cooled direct-injection 4-stroke diesel engine
Starting System	Recoil, Electric starter

Pump Specifications

Suction Discharge Port	50mm (2")
Max Height of Self Priming	8 m

Operational Data

Fuel Tank Capacity	4.5 L
Rated Continuous Operation	3 H

Physical Dimensions

Dimensions (L x W x H)	575 x 490 x 580 mm
Dry Weight	65 kg
