

Industrial Power Generating Sets

These generating sets are designed for reliable power generation in various industrial and commercial applications. Featuring a durable enclosure for weather protection and noise reduction ensures optimal performance and longevity.

Overview

Industrial Power Generating Sets

These industrial generating sets provide a robust and efficient solution for backup, prime, or continuous power needs across various commercial and industrial applications. Designed with durability in mind, the units feature an enclosure that offers both weather protection and effective noise reduction. Equipped with advanced control systems, the units ensure reliable operation through automatic voltage regulation and comprehensive overload protection.

Key Features

Operational Protection

- Weather-resistant enclosure
- Noise reduction design
- Automatic voltage regulation
- Overload protection

Application Suitability

Backup Power, Prime Power, Continuous Power, Industrial Use, Commercial Use

Performance

Model Identifier

HFS-24RX
