

Industrial Power Generator

This generator is a robust and reliable power generation solution suitable for various applications. Its durable construction includes ventilation grills for efficient cooling and a lifting lug for convenient handling.

Overview

Industrial Power Generation

The AUX series industrial power generators are engineered for high-performance and reliable power supply in demanding applications. Featuring a reinforced auxiliary winding excitation system, these units provide superior motor starting capabilities. With a versatile range from 20kVA to 400kVA, they are designed to deliver consistent and stable output for critical operations.

Performance

Rated Current Output

30 seconds

Max Output Duration

20 seconds

Sustained Duration

Power Output Range

20kVA - 400kVA

Technical Specifications

Excitation System

Reinforced auxiliary winding system

Available Models

AUX180, AUX225, AUX270, AUX315
