Product Overview

Industrial Power Generation Solution

This heavy-duty industrial generator is engineered for reliable and continuous power supply in demanding environments. Designed for both primary and backup power applications, the unit features a robust diesel engine coupled with a high-performance alternator. Built on a sturdy base frame, it includes an integrated cooling system and a user-friendly control panel to ensure consistent operation.

Technical Specifications

Power Type	Diesel
Key Design Features	Heavy-duty construction, Base frame mounted, Integrated cooling system, Sound attenuation capable

Performance Metrics

Operational Highlights

100 % Reliability Rating	24 Hours Duty Cycle

Applications

Suitable Applications

- Backup power for industrial facilities
- Primary power for remote sites
- Construction site power
- Emergency power supply
