

Industrial Power Generator Unit

The industrial power generator unit is designed for heavy-duty applications. It provides a reliable power supply for critical operations.

Overview

Industrial Power Generator Unit

The EA-200 is a robust industrial power generator designed for heavy-duty applications. It offers a total wattage of 5.6KW and features a dedicated compressor wattage of 5.1KW, ensuring reliable power for critical operations. With a substantial 110L storage capacity and versatile temperature ranges for both hot and cold water, this unit is engineered for demanding industrial environments.

Performance Metrics

Total Wattage

5.6 KW Total Wattage	5.1 KW Compressor Wattage
--------------------------------	-------------------------------------

Storage Capacity	110 L
------------------	-------

Temperature Range

Cold Water Range	15°C - 40°C
Hot Water Range	35°C - 95°C

Physical Specifications

Model Identifier	EA-200
Net Weight	320 kg
Dimensions (LxWxH)	1280 x 720 x 1600 mm
