

# Industrial Power Socket

This industrial power socket is designed for heavy-duty applications requiring secure and reliable electrical connections. Its robust construction includes a protective cover to prevent dust and water ingress.

## ADDITIONAL IMAGES

## Overview

### Industrial Power Socket

This industrial power socket is designed for heavy-duty applications, providing robust construction for durability and reliability in demanding environments. It features a protective cover to prevent dust and water ingress when not in use, ensuring long-term performance. Engineered for secure and stable connections, this solution offers safety and efficiency for industrial power distribution.

## Technical Specifications

### Technical Parameters

| Parameter              | Value                          |
|------------------------|--------------------------------|
| Model name             | EPL-2131-4, EPL-2131, EPL-2141 |
| Standard               | IEC60309                       |
| Poles                  | 2P+E                           |
| Rated Current (In)     | 16A / 32A                      |
| Rated Voltage (Un)     | 110V-130V                      |
| Earth contact position | 4H                             |
| Protection degree      | IP44                           |
| Cable cross-section    | 1-2.5 / 2.5-6 mm <sup>2</sup>  |
