

Industrial Pressing Machine with Integrated Iron

This industrial pressing machine is designed for professional garment care. It features a padded pressing surface, overhead arm with spray nozzles, and integrated iron.

Overview

Professional Industrial Pressing Solution

This industrial pressing machine is engineered for high-volume garment care, making it an essential asset for dry cleaning and laundry facilities. It features a robust, padded pressing surface and an overhead arm equipped with precision spray nozzles for optimal fabric treatment. With an integrated iron and a comprehensive control panel, this unit provides the stability and control required for professional-grade results.

Key Features

Core Components

- Integrated Industrial Iron
- Overhead Spray Nozzle Arm
- Padded Pressing Surface
- Advanced Control Panel
- Heavy-duty Stabilizing Base

Suitable Applications

Dry Cleaning, Laundry Services, Garment Care
