

Industrial Pressure Tank

This pressure tank is designed for industrial applications requiring consistent pressure maintenance. It features a robust construction with a flanged connection for secure mounting and efficient fluid transfer.

Product Overview

Industrial Pressure Tank Overview

These industrial pressure tanks are designed for reliable pressure regulation and fluid storage in demanding environments. Featuring a robust spheroidal construction, they are built to withstand high pressures and temperatures while maintaining consistent performance. The compact design ensures easy integration into existing fluid management systems, suitable for a wide range of industrial applications.

Technical Specifications

Maximum Pressure	8 bar
Maximum Temperature	99 °C
Air Pressure Range	1.5 - 1.8 bar
Connection Sizes	1/2"G, 3/4"G, 1"G

Model Range

Model Specifications

Capacity (L)	Diameter (mm)	Height (mm)
1	80	150
5	114	180
8	200	235
12	205	400
19	265	400
24	265	470
36	383	470
