

Industrial Pressure Transmitter with Digital Display

This pressure transmitter adopts imported pressure sensing parts. It compensates temperature through computer laser resistant adjustment and offers stable performance.

Product Overview

Industrial Pressure Transmitter

The DL 2088 series pressure transmitter utilizes high-quality imported sensing components with computer-aided laser temperature compensation. This advanced design ensures stable performance and high accuracy across demanding industrial environments. Its compact, robust stainless steel construction is optimized for reliable, maintenance-free operation in heavy-duty applications.

Technical Specifications

Output Signal	4-20mA DC (Two-wire)
Wetted Materials	Stainless steel
Key Advantages	Stable Performance, High Accuracy, Compact Design, Anti-Shock
Mechanical Design	No mechanical moving parts, friction-free, gap-free

Industrial Applications

Common Industries

- Petrochemical
- Food and Beverage
- Medical
- Electrical Power
- Papermaking
- Metallurgy
- Environmental
