

Industrial Push Button Switch with Red Actuator

This compact push button switch is designed for industrial applications. It features a metallic bezel, a red actuator button, and a modular contact block for easy wiring.

Product Overview

Industrial Push Button Switch

This compact and robust push button switch is engineered for demanding industrial environments and control panel applications. It features a high-durability metallic bezel paired with a high-visibility red actuator. The modular design incorporates a contact block that ensures both easy wiring and reliable, responsive operation for machinery interfaces.

Technical Specifications

Actuator Color	Red
Bezel Material	Metallic

Certifications

Compliance and Standards	CE
