

Industrial Reducer Gearbox Chassis

This heavy-duty reducer chassis is designed for industrial applications. Constructed from robust steel, this chassis provides a stable and secure mounting platform for reduction gearboxes.

Product Overview

Industrial-Grade Mounting Solution

This heavy-duty reducer chassis is engineered to provide a stable, secure mounting platform for industrial reduction gearboxes. Constructed from robust steel with reinforced support structures, it ensures exceptional durability and long-lasting performance in demanding environments. Designed for versatility, the unit features a large central opening to accommodate various reducer sizes and includes strategically placed mounting holes for seamless installation.

Technical Specifications

Installation Features

- Large central opening for various reducer sizes
- Strategically placed mounting holes
- Reinforced support structures

Material	Robust Steel
Surface Coating	Corrosion Resistant, Wear Resistant
