

Industrial Refrigeration and Ventilation System

This high-efficiency system provides both refrigeration and ventilation. It is designed for industrial and commercial applications needing precise temperature and air quality management.

Product Overview

Industrial Cooling & Air Quality Solutions

This industrial refrigeration and ventilation system is engineered for high-performance climate control in demanding environments. By utilizing advanced compressor technology and a dual-fan outdoor configuration, the unit ensures consistent temperature regulation and superior air distribution. It provides a reliable, energy-efficient solution for both industrial and commercial facilities requiring precise air quality management.

Technical Specifications

Performance Metrics

2 units

Outdoor Fan Count

System Architecture

- High-efficiency outdoor unit
- Dual-fan cooling assembly
- Advanced industrial-grade compressor
- Optimized indoor air distribution unit

Compliance and Usage

Key Features

High Efficiency • Reliable Compressor • Precise Air Quality Control

Suitable Applications

Industrial Facilities, Commercial Environments, Temperature Controlled Storage
