

Industrial Refrigeration and Ventilation Unit

This industrial unit provides both refrigeration and ventilation. It is designed for cooling and air handling applications, featuring a control panel with a digital display and pressure gauges.

General Overview

Industrial Air Handling Solutions

This industrial-grade refrigeration and ventilation unit is engineered for demanding temperature and air quality control applications. It features integrated digital monitoring and precise pressure management tools to ensure optimal system performance in diverse industrial environments. Designed for reliability, the unit combines robust cooling capabilities with high-efficiency air circulation.

System Features

Monitoring System

- Digital control panel
- Pressure gauge monitoring
- Real-time system performance tracking
