

Industrial Refrigeration Compressor

This refrigeration compressor is designed for industrial cooling and ventilation systems. It features a stainless steel pump housing and a high-efficiency electric motor for reliable and long-lasting performance.

Product Overview

Industrial-Grade Performance

This robust refrigeration and ventilation compressor is engineered specifically for demanding industrial environments. It incorporates a durable stainless steel pump housing paired with a high-efficiency electric motor to ensure consistent, long-term reliability. Its versatile design makes it an ideal choice for a broad range of cooling and air handling systems.

Technical Specifications

Pump Housing Material	Stainless steel
Motor Type	High-efficiency electric motor
Application Compatibility	Refrigeration, Ventilation, Air Handling, Cooling Systems
