

Industrial Rolling Bearing

This high-precision rolling bearing is suitable for various industrial applications. It is available in multiple sizes and configurations to suit diverse load and speed requirements, with weights ranging from 1.4 kg to 21.9 kg.

Overview

High-Precision Industrial Rolling Bearings

These industrial rolling bearings are engineered for high-performance applications requiring precision and durability. Available in a wide variety of configurations, they support dynamic load ratings up to 245kN and static load ratings up to 293kN. These components are designed to maintain stability in demanding industrial environments with varying speed and load requirements.

Performance Metrics

Load Ratings

245 kN

Max Dynamic Load (Cr)

293 kN

Max Static Load (Cor)

Limiting Speeds

- 4300
- 3600

Technical Specifications

Dimensional Range	d: 120-260mm, D: 165-370mm, B: 22-60mm
Weight Range	21.9 kg

Product Data Table

Technical Reference Table

Designation	d (mm)	D (mm)	Cr (kN)	Weight (kg)
6026	126	130	40.8	1.4
6030	130	150	132	5
6036	180	280	188	11.2
6048	148	240	245	21.9
