

Industrial SCR Arc Welding Rectifier

This heavy-duty SCR arc welding rectifier is designed for industrial applications. It features adjustable parameters for precise welding control and is equipped with analog meters for monitoring welding parameters.

Overview

Industrial Performance

This heavy-duty SCR arc welding rectifier is engineered for demanding industrial environments requiring precise welding control. The system features adjustable current and voltage regulation, ensuring stable arc performance across a variety of welding processes. Built with high-durability components, it is designed for reliable operation in harsh working conditions while maintaining high efficiency.

Technical Specifications

Performance Metrics

630 A

Rated Current

Model ID

ZX5-630-2

Features

Control Features

- Adjustable current regulation
- Adjustable voltage regulation
- Analog parameter monitoring meters

Mobility

Yes

Design Features

SCR Technology, Industrial Grade, Wheel-mounted
