

# Industrial Screw Air Compressor UG55

This industrial air compressor utilizes a screw mechanism for efficient air compression. It is designed for continuous operation and features a digital control panel for precise monitoring.

## Product Overview

### Industrial-Grade Performance

The UG55 Screw Air Compressor is a robust and efficient solution engineered for continuous, high-demand industrial operations. Featuring a reliable screw compression mechanism, it ensures consistent performance, longevity, and operational stability. Designed with a compact footprint and easy-access maintenance panels, this unit is perfectly suited for a wide range of demanding industrial environments.

## Key Metrics

Model Name	UG55
Mechanism Type	Screw Compressor

## Safety & Control

Safety Protections	Emergency Stop, Overload Protection
Monitoring	Integrated control panel with digital display for parameter adjustments

## Design & Maintenance

Housing	Durable cabinet with easy access panels
Installation Type	Compact footprint
