Product Overview

Industrial Screw Oil Press

The ZX21 Industrial Screw Oil Press is engineered for high-efficiency, large-scale oil extraction operations. This robust machine features a compact, reliable structure designed for consistent performance and ease of maintenance. With its advanced design, it delivers excellent results in reducing oil residue in the cake, ensuring maximum yield for professional processing facilities.

Key Performance Metrics

Performance Overview

26 t/24h

Average Capacity

6.5 %

Average Oil in Cake

49.5 kW

Total Power

Technical Specifications

Technical Data

Parameter	Value
Daily Capacity	22-30 tons
Oil Residue Rate	5-8%
Power Configuration	45 + 3 + 1.5 kW
Net Weight	4800 kg
Dimensions (L*W*H)	4000*1100*2300 mm

Key Features

Core Advantages

- Compact and reasonable structure design
- High production efficiency
- Low oil residue in cake
- Convenient operation and maintenance
- Reliable performance
