Product Overview

High-Performance Industrial Sealing Solutions

Our industrial sealing O-rings are precision-engineered to prevent leakage of fluids and gases in demanding mechanical environments. Available in a comprehensive range of standard and non-standard sizes, these seals are compatible with diverse industrial, hydraulic, pneumatic, and automotive applications. Manufactured from a variety of high-quality elastomeric materials, they ensure reliable performance and system integrity across various operating conditions.

Technical Specifications

Color Variations

Black • Orange • Brown • Green • Various

Available Materials

EPDM, NBR, HNBR, Silicone, FKM, Viton, NR, PU

Size Options

Standard and non-standard sizes available

Compliance & Usage

Common Industries

- Hydraulic Systems
- Pneumatic Systems
- Automotive
- General Industrial Machinery

Quality Standards

ISO 9001
