

# Industrial Second Drying Tower

This industrial drying tower is designed for efficient moisture removal in industrial processes. It is certified with ASME U/U2/N/NPT, ISO9001, and DNV CLASSIFICATION SOCIETY certificates.

## Product Overview

### Industrial Second Drying Tower

This industrial second drying tower is a robust piece of specialized equipment designed for demanding high-pressure environments. Constructed from high-grade 16MnR material, it offers reliable performance for petrochemical and refinery applications. Its significant scale and engineering specifications make it an essential component for large-scale industrial processing facilities.

## Technical Specifications

### Design Pressure

**2.4 Mpa**

Design Pressure

### Material

16MnR

### Design Temperature Range

-10 to 75°C

## Physical Dimensions

### Dimensions

\$2100×12683×20

### Weight

88 T
