

Industrial Sewing Machine Clutch Motor

This clutch motor is designed for industrial sewing machines, offering precise speed control and reliable operation. Its robust construction ensures durability and consistent performance in applications requiring intermittent start-stop functionality.

Overview

High-Performance Industrial Clutch Motor

This industrial sewing machine clutch motor is engineered for high-performance applications requiring robust construction and long-term durability. It features precise speed control and reliable operation, making it an ideal choice for intermittent start-stop sewing tasks. The inclusion of a foot pedal ensures convenient speed adjustment for efficient and consistent performance across various industrial sewing projects.

Performance

Key Performance Metrics

1 Clutch
Motor Type

Operation Mode

Intermittent start-stop functionality

Control & Accessories

Included Components

- Clutch Motor Unit
- Foot Pedal for speed adjustment

Speed Control

Precise speed control via integrated foot pedal

Build Quality

Construction Features

Robust Construction, Durable Design, Industrial Grade

Applications

Suitable Applications

Industrial Sewing • Consistent Performance Tasks • Efficient Production
