

Industrial Sewing Machine for Apparel and Shoe Production

This industrial sewing machine is designed for manufacturing garments, shoes, and accessories. It features a robust metal frame, integrated table, and foot pedal control for efficient and high-quality production.

Overview

Industrial Precision Sewing

This industrial sewing machine is engineered specifically for the rigorous demands of apparel, footwear, and accessory manufacturing. Featuring a robust metal frame and integrated table, it provides a stable platform for high-volume production. Equipped with precision stitching mechanisms and multi-spool capability, it delivers consistent, high-quality results across a wide variety of fabric types.

Key Features

Construction

Robust Metal Frame • Integrated Table

Suitable Applications

Apparel Manufacturing, Shoe Production, Accessory Manufacturing, Textile Industry

Technical Specifications

Control System

Foot pedal control

Thread Handling

Multiple thread spools
