

Industrial Sewing Machine for Garments and Shoes

This heavy-duty industrial sewing machine is designed for manufacturing garments, shoes, and accessories. It features adjustable settings for various material thicknesses and stitch types.

Overview

Industrial Precision for High-Volume Production

This heavy-duty industrial sewing machine is engineered specifically for the demanding environments of garment, shoe, and accessory manufacturing. It offers robust construction for long-term durability and maintains precision stitching across various material thicknesses. Designed for reliability, it ensures consistent performance in high-volume production settings.

Technical Specifications

Suitable Applications

- Garment Manufacturing
- Shoe Production
- Accessory Assembly

Model Identifier	GK15-1A
Safety Features	Caution Labels, Pressure Monitoring

Performance Metrics

Operating Conditions

1 Yes

Pressure Gauge Included
