

Industrial Sewing Machine for Garments and Shoes

This industrial sewing machine is designed for heavy-duty applications in garment and shoe manufacturing. It features a high-speed stitching mechanism and adjustable settings for various materials.

Overview

Industrial Precision Sewing

This industrial sewing machine is engineered for heavy-duty applications in garment, shoe, and accessory manufacturing. Its robust construction ensures exceptional stability and durability, even during high-speed production cycles. Designed for versatility, it handles a wide range of materials including leather, canvas, and synthetic fabrics with precision and consistency.

Performance & Operation

Key Performance Features

- High-speed stitching mechanism for efficient production
- Integrated lubrication system for smooth, reliable performance
- Adjustable stitch length settings
- Adjustable tension settings for customized sewing

Compatibility

Material Compatibility

Leather, Canvas, Synthetic Fabrics

Safety & Compliance

Safety Indicators

Caution Label Equipped
