

Industrial Sewing Machine for Garments and Shoes

This high-speed industrial sewing machine is designed for manufacturing garments, shoes, and accessories. It features a multi-thread system, adjustable stitch length, and a differential feed mechanism.

Overview

High-Performance Industrial Sewing Solution

This high-speed industrial sewing machine is engineered specifically for the rigorous demands of garment, shoe, and accessory manufacturing. Featuring a robust multi-thread system and a precision differential feed mechanism, it ensures consistent quality across a wide variety of fabric types. Designed for reliability in demanding production environments, the machine includes an automatic lubrication system for extended operational lifespan and a user-friendly control panel for efficient, precise adjustments.

Technical Specifications

Key Features

- Multi-thread system
- Adjustable stitch length
- Differential feed mechanism
- Automatic lubrication system
- User-friendly control panel

Machine Type

High-speed industrial sewing machine

Suitable Applications

Garment Manufacturing, Shoe Production, Accessories
