

Industrial Sewing Machine for Garments and Shoes

This industrial sewing machine is designed for garment, shoe, and accessory manufacturing. It features a programmable control panel, adjustable speed settings, and a robust build for continuous operation.

Overview

High-Performance Industrial Sewing Solution

This industrial sewing machine is engineered for high-volume manufacturing environments, specifically tailored for garment, shoe, and accessory production. It features a programmable control panel for automated stitching patterns and adjustable speed settings to maximize production efficiency. Built for continuous operation, the machine incorporates an advanced lubrication system and precision tension control to ensure consistent stitch quality and long-term durability across a wide range of materials.

Technical Features

Control System	Programmable control panel
Automation	Automated stitching patterns, Adjustable speed settings

Performance

Operational Metrics

1 Ready
Continuous Operation

Lubrication System	Advanced automatic lubrication
