

Industrial Sewing Machine for Garments and Shoes

This industrial sewing machine is designed for manufacturing garments, shoes, and accessories. The heavy-duty machine features robust construction, precise stitching capabilities, and adjustable settings for various fabric thicknesses.

Product Overview

Industrial Manufacturing Solution

This heavy-duty industrial sewing machine is engineered specifically for high-volume production environments in the garment, shoe, and accessory industries. Featuring robust construction and precise stitching capabilities, it ensures durability and consistent output quality. The machine includes adjustable settings to accommodate a wide variety of fabric types and material thicknesses, making it a versatile asset for professional manufacturing lines.

Key Features

Operational Capabilities

- Heavy-duty construction
- Precise stitching control
- Adjustable settings for material thickness
- High-volume production ready

Primary Applications

Garment Manufacturing, Shoe Production, Accessories Manufacturing

Safety and Compliance

Safety Indicators

Caution Labeling
