

Industrial Sewing Machine for Garments and Shoes

This high-speed industrial sewing machine is designed for efficient garment, shoe, and accessory manufacturing. It offers precision stitching and robust performance for high-volume production environments.

Overview

High-Performance Industrial Sewing Solution

This high-speed industrial sewing machine is engineered specifically for garment, shoe, and accessory manufacturing environments. Designed for high-volume production, it combines precision stitching with a robust construction to ensure consistent quality and minimal downtime. The machine supports versatile sewing applications including overlocking, hemming, and decorative stitching, making it a reliable asset for professional production lines.

Key Metrics

Performance Highlights

1 High-Speed

Operation Type

1 Multi-thread

System

Technical Specifications

Adjustability

- Adjustable stitch length
- Adjustable stitch width

Construction

Durable Construction • Industrial Grade

Sewing Capabilities

Overlocking, Hemming, Decorative Stitching

Application

Target Industries

Garment Manufacturing, Shoe Production, Accessory Manufacturing
