

Industrial Sewing Machine for Garments and Shoes

This industrial sewing machine is designed for manufacturing garments, shoes, and accessories. It features a robust construction for continuous operation and handles a variety of materials.

Overview

Industrial Manufacturing Capability

This heavy-duty industrial sewing machine is engineered for high-volume production environments, including garment, shoe, and accessory manufacturing. It features a robust construction designed for continuous, reliable operation on the factory floor. With a high-speed motor and precision stitching capabilities, this machine handles a diverse range of materials, from delicate fabrics to tough leather and synthetics.

Technical Specifications

Key Performance Metrics

1 High-Speed

Motor Type

Core Features

- Precision stitching mechanism
- Adjustable stitch length
- Large work surface
- User-friendly control panel

Compatible Materials

Fabrics, Leather, Synthetic Materials

Operational Details

Ideal For

Garment Manufacturing • Shoe Production • Accessory Manufacturing • High-Volume Factories

Maintenance

Easy maintenance access via control panel
