

Industrial Sewing Machine for Garments and Shoes

This industrial sewing machine is designed for garment, shoe, and accessory manufacturing. It features precision stitching mechanisms and a robust build for continuous operation across various materials and seam types.

Product Overview

Industrial Precision Sewing Solution

This industrial sewing machine is engineered specifically for the demanding requirements of garment, shoe, and accessory manufacturing. It features a robust build designed for continuous, high-volume operation, ensuring reliability on the factory floor. Equipped with a programmable control panel and precision stitching mechanisms, it offers the versatility needed for various materials and complex seam types.

Technical Features

Model Identifier	JK-T1900GSK
Key Capabilities	Programmable Control, Precision Stitching, Continuous Operation, Multi-Material Compatibility

Applications

Suitable Industries

- Garment Manufacturing
- Shoe Production
- Accessory Manufacturing
