

Industrial Sewing Machine for Garments and Shoes

This sewing machine is designed for garment, shoe, and accessory manufacturing. It offers adjustable stitch settings and a versatile feed system for various sewing tasks like straight, zigzag, and buttonhole stitching.

Overview

Industrial Sewing Solution

This industrial-grade sewing machine is engineered for high-precision manufacturing of garments, footwear, and accessories. It features advanced mechanical systems, including adjustable stitch settings and a robust needle penetration mechanism, ensuring consistent quality across various material types. With versatile capabilities such as straight stitching, zigzag stitching, and buttonhole creation, this machine provides the flexibility needed for demanding professional production environments.

Technical Capabilities

Key Mechanisms

- Adjustable stitch settings
- High-penetration needle mechanism
- Advanced material feed system

Stitch Patterns

Straight Stitch, Zigzag Stitch, Buttonhole

Applications

Target Industries

Garment Manufacturing • Footwear Production • Accessories Assembly
