

Industrial Sewing Machine for Garments and Shoes

This high-speed industrial sewing machine is designed for manufacturing garments, shoes, and accessories. It offers precision stitching and efficient operation for various textile and leather applications.

Overview

Industrial Precision Sewing

This high-speed industrial sewing machine is engineered specifically for the demanding requirements of garment, shoe, and accessory manufacturing. Built for continuous operation, it offers exceptional precision stitching and reliable performance across a variety of textile and leather applications. Its robust construction ensures durability in heavy-duty production environments, making it an ideal choice for seaming, hemming, and intricate decorative stitching.

Technical Specifications

Material Compatibility

- Textiles
- Leather

Stitching System

Multi-thread system

Suitable Applications

Garment Manufacturing, Shoe Production, Accessory Assembly, Seaming, Hemming, Decorative Stitching

Performance

Operation

High-Speed • Continuous Use

Stitch Length

Yes
