

Industrial Sewing Machine for Garments and Shoes

This high-speed industrial sewing machine is designed for manufacturing garments, shoes, and accessories. It features precision stitching mechanisms and adjustable settings for various fabric types.

Overview

High-Performance Industrial Sewing Solution

This high-speed industrial sewing machine is engineered specifically for the rigorous demands of garment, shoe, and accessory manufacturing. Designed for both mass production efficiency and intricate detailing, it features a robust construction suitable for continuous, heavy-duty operation. With an integrated advanced lubrication system, this machine ensures smooth performance and an extended service lifespan, making it a reliable asset for professional production environments.

Performance Metrics

Operational Speed

5000 RPM

Max Speed

Technical Specifications

Lubrication System

Advanced Automatic Lubrication

Key Features

- Precision stitching mechanism
- Adjustable settings for diverse fabric types
- Robust heavy-duty construction
- Designed for continuous operation

Primary Applications

Garment Manufacturing, Shoe Production, Accessory Manufacturing
