

Industrial Sewing Machine for Garments and Shoes

This industrial sewing machine is designed for garment, shoe, and accessory production. It features adjustable stitch length and a reliable lubrication system for efficient and durable stitching.

Overview

Industrial Sewing Solution

This industrial sewing machine is engineered specifically for the demanding environments of garment, shoe, and accessory manufacturing. It features a high-speed motor and an automatic lubrication system, ensuring consistent performance and reliability during long production runs. Designed with both efficiency and operator comfort in mind, the unit includes an ergonomic foot pedal and a spacious work table to support high-volume output.

Technical Specifications

Key Features

- High-speed motor for efficient production
- Automatic lubrication system
- Adjustable stitch length
- Ergonomic foot pedal
- Spacious integrated work table

Performance Metrics

1 Automatic

Lubrication Type

Applications

Garment Manufacturing, Shoe Production, Accessory Fabrication
