

Industrial Sewing Machine for Garments and Shoes

This heavy-duty industrial sewing machine is designed for manufacturing garments, shoes, and accessories. It features adjustable settings for stitch length, thread tension, and presser foot pressure.

Overview

Industrial Sewing Machine

This heavy-duty industrial sewing machine is engineered for the rigorous demands of garment, shoe, and accessory manufacturing. Its robust construction ensures consistent, reliable performance even when handling thick materials in high-volume production environments. With precision stitching mechanisms and highly adjustable settings, it provides the versatility needed for professional workshops and factories.

Technical Specifications

Sewing Operations

- Stitching
- Hemming
- Edge finishing

Adjustable Parameters

Stitch length, Thread tension, Presser foot pressure

Application

Suitable For

Garment Manufacturing • Shoe Production • Accessory Manufacturing • Professional Workshops
