

Industrial Sewing Machine for Textile Manufacturing

This high-speed industrial sewing machine is designed for efficient stitching of various textile materials. It features adjustable settings for stitch length and tension to accommodate different fabric types.

Product Overview

Industrial Sewing Excellence

This high-speed industrial sewing machine is engineered for the precise and efficient stitching of diverse textile materials. Built with a robust frame, it ensures maximum stability and durability for demanding garment manufacturing and upholstery operations. The machine features highly adaptable controls, allowing users to fine-tune stitch length and tension for optimal performance across varied fabric types.

Technical Specifications

Applications

- Garment manufacturing
- Upholstery
- General textile processing

Operational Labels

COLORLION • ATTENTION • A

Key Features

High-Speed Operation, Adjustable Stitch Length, Adjustable Tension, Heavy-Duty Construction
