

Industrial Sewing Machine for Textile Manufacturing

This industrial sewing machine is designed for apparel and textile manufacturing. It features adjustable settings for stitch length and tension control, making it suitable for various fabric types and garment construction processes.

Overview

Industrial Precision for Textile Manufacturing

This industrial sewing machine is engineered for high-volume apparel and textile production environments. It features a robust, durable construction designed for consistent performance under demanding conditions. With integrated controls for stitch length and tension, it provides the precision required for diverse garment construction processes.

Technical Specifications

Model Number	BS-200N
Primary Applications	Apparel Manufacturing, Textile Production, Garment Construction

Features

Operational Capabilities

- Adjustable stitch length control
- Precision tension adjustment
- High-volume production design
- Durable heavy-duty construction

Compliance
