Overview

Industrial High-Performance Ironing

This professional-grade ironing machine is designed for high-efficiency processing of bed sheets, tablecloths, towels, and curtains in commercial environments like hotels and hospitals. Featuring advanced heating chamber recycling and frequency-controlled ironing speeds, it balances high throughput with energy-efficient operation. Built with robust safety systems including finger guards and multiple emergency stops, it ensures reliable and safe performance for heavy-duty laundry operations.

Compliance

Certifications

CE, ISO 9001

Performance

Speed Range

40 m/min

Maximum Speed

Technical Specifications

Model Specifications

Model	Speed (m/min)	Power (kW)	Weight (kg)
YPI-1800	0-7	0.75	1000
YPI-2500	0-7	0.75	1200
YPI-2800	0-7	0.75	1500
YP II-2800	0-15	1.5	2300
YP II-3000	0-15	1.5	2460
YP III-3000	0-30	2.2	3460

Features

Key Features

- Automatic horizontal structure
- Steam or electrical heating options
- Large touch screen control interface
- Frequency converter for speed adjustment
- Thermal insulator coverage to reduce heat loss
- Pneumatic roll lifting system

Safety

Safety Mechanisms

- Integrated finger guard
- Anti-curliness device
- Low pressure alarm system
- Multiple emergency stop buttons
