

Industrial Shredder for Assembly and Production Lines

This heavy-duty shredder is designed for assembly and production line applications. It features a robust construction and a powerful motor for efficient shredding of various materials.

Product Overview

Industrial Shredder for Assembly and Production Lines

This heavy-duty industrial shredder is engineered specifically for integration into assembly and production line environments. It features a robust construction with a durable white hopper and a stable blue base, ensuring longevity in demanding manufacturing settings. Equipped with mobility wheels and a high-performance motor, it provides an efficient solution for on-site recycling and waste management.

Design and Build

Color Scheme

White Hopper • Blue Base

Design Features

Heavy-duty construction, Mobile design, Wheeled base

Operational Capabilities

Primary Applications

- Assembly line waste management
- Production line recycling
- General manufacturing waste processing

Performance

1 High-Power

Motor Type
