

Industrial Shrink Wrapping Machine

This industrial shrink wrapping machine is designed for packaging applications using heat shrinkable film. It features a conveyor system to move products through a heat tunnel, ensuring a tight and professional shrink wrap finish.

Product Overview

Industrial Heat Shrink Packaging Solution

This industrial shrink wrapping machine is engineered for high-efficiency packaging of beverages, food products, and industrial goods. By utilizing far-infrared radiation, it provides a secure and professional shrink effect for PE, PVC, and PP films. The robust conveyor system and precise temperature control ensure consistent, moisture-proof, and pollution-resistant packaging for a variety of product types.

Technical Specifications

Model	SQ-4525
Supported Shrink Films	PE, PVC, POP, PP
Heating Principle	Far infrared radiation

Key Features

Operational Benefits

- Moisture-proof and anti-pollution protection
- Solid-state pressure regulator for stable temperature control
- External cooling fan for consistent finish
- Robust frame with casters for mobility
- Insulated tunnel walls to minimize heat loss

Applications

Suitable Industries

Beverage • Food • Pharmaceutical • Industrial Goods
