

Industrial Single Output 1000W 12V Power Supply

This single output power supply is designed for industrial applications. It provides a stable 12V DC power source with 1000W output and 85% efficiency.

Overview

Industrial Power Solution

This high-efficiency industrial power supply is engineered for demanding environments, offering a stable and reliable power source. With its compact volume and lightweight design, it is perfectly suited for integration into military, aerospace, and home appliance systems. The unit features robust protection mechanisms to ensure operational safety and longevity in diverse applications.

Electrical Specifications

Rated Power

1000 W
Total Power

Input Voltage Range	90~130VAC / 170~265VAC
Input Frequency	50/60Hz
Output Voltage	12 V

Safety & Compliance

Certifications

CE • RoHS

Protection Features	Overload Protection, Overvoltage Protection
---------------------	---

Physical Dimensions

Dimensions (L x W x H)	291 x 132 x 68 mm
------------------------	-------------------
