

# Industrial Single Output Power Supply 120W

This industrial power supply is designed for indoor applications. It features an AC input that is selectable by switch and provides a designed efficiency of 85%.

## ADDITIONAL IMAGES

## Overview

### Industrial Single Output Power Supply

This 120W industrial power supply is engineered for high efficiency, low noise, and minimal ripple, making it an ideal choice for demanding environments. Its compact, lightweight design ensures versatility across applications ranging from aerospace and military systems to home appliance apparatus. Built with a robust, perforated metal enclosure, the unit provides reliable heat dissipation and stable power delivery.

## Electrical Specifications

### Available Output Voltages

- 5V
- 12V
- 15V
- 24V

Rated Power	120 W
Input Voltage Range	90-130VAC, 170-265VAC
Frequency	50 Hz

## Safety & Compliance

### Protection Features

Overload Protection • Overvoltage Protection

Certifications	CE, RoHS
----------------	----------

## Physical Characteristics

Dimensions (L x W x H)	199 x 97 x 38 mm
Enclosure Design	Perforated metal enclosure for heat dissipation
