

Industrial Single Screw Air Compressor

This is an industrial-grade single screw air compressor designed for supplying compressed air. It features robust construction and an advanced control system.

Overview

Industrial Efficiency

This industrial-grade single screw air compressor is engineered to provide a reliable and consistent supply of compressed air for demanding production environments. Its robust construction ensures long-term operational stability, while the integrated advanced control system optimizes performance to meet diverse industrial requirements. Designed for high efficiency, it serves as a dependable cornerstone for industrial pneumatic systems.

Performance

Operational Performance

15 kW

Power Rating

Model Designation	FHOGD-15F
-------------------	-----------

Technical Features

Technology Type	Single Screw Air Compression
Construction Standard	Industrial Grade, Robust Design
Control System	Yes
