

Industrial Solenoid Valve for Fluid Control

This solenoid valve is designed for industrial applications requiring precise fluid control. It utilizes an electrically actuated solenoid to regulate the flow of fluids or gases in pneumatic and hydraulic systems.

Product Overview

Industrial Fluid Control Solution

This high-performance solenoid valve is engineered for demanding industrial fluid and gas control applications. Featuring a robust brass body construction, it offers excellent durability and reliability in pneumatic and hydraulic systems. Designed as a three-way valve, it provides versatile flow path management for precise process automation.

Technical Specifications

Valve Configuration	3-way solenoid valve
Body Material	Brass
Actuation	Electrically actuated

Application Suitability

Compatible Systems	Pneumatic systems, Hydraulic systems
