

Industrial Speed Reducer

This speed reducer is designed for industrial applications requiring efficient power transmission. Its robust construction ensures durability and consistent performance.

Product Overview

Industrial Speed Reducer Solutions

This industrial-grade speed reducer is engineered for high efficiency and consistent power transmission in demanding environments. With a rich manufacturing heritage dating back to 1976, the product line meets international standards for quality and performance. These units are widely utilized globally across diverse industrial machinery sectors for precise speed control.

Certifications

Quality Certifications

ISO 9001, CE Certified

Product Range

Available Gearbox Series

- Worm gear speed reducer (iron steel cases)
- Motovario type aluminum case worm gear speed reducers
- SEW type helical gear speed reducers
- Sumitomo type cyclo drive gearboxes
- ROTEX type jaw coupling
- Flange coupling
- Door operators

Key Performance Metrics

Production Output

25 Million USD

Annual Output Value

Market Presence

Global Export Reach

38 Countries
