

Industrial Spindle Moulder for Woodworking

This industrial woodworking machine is designed for shaping and profiling wood. It features a large work table, adjustable fences, and a spindle for mounting various cutting tools.

Product Overview

Industrial Precision for Woodworking

This industrial spindle moulder is engineered for high-performance shaping and profiling of wood components. Built with a robust metal frame, it ensures stability and durability under demanding professional usage. Featuring an intuitive control panel with integrated safety systems and efficient dust management, this machine provides a reliable solution for precision woodworking applications.

Technical Specifications

Standard Equipment

- Large work table
- Adjustable fences
- Tool-mounting spindle
- Integrated control panel
- Emergency stop button
- Dust collection port

Frame Material	Robust metal frame
Safety Compliance	Emergency Stop, Dust Collection
